

GHENT: *une histoire* d'**EAU**

MIPIM 2011

MIPIM 2011

Ghent, living and working along the water

"The City of Ghent is Europe's best kept secret and a city you should definitely visit in 2011"
(Lonely Planet, 2010).

Ghent has changed spectacularly during the past few years. Water has become a tangible element in many parts of the city.

During MIPIM 2011 we will showcase developments connected with water such as the Port of Ghent, the urban renewal project Oude Dokken and the smart logistics business park Eiland Zwijnaarde.

Together they form the beating heart of the historical city, its inhabitants and the economy.

MARCH 10TH

from 9u30 am
